## Fund Description

The Lazard Global Quality Growth Fund seeks to generate strong relative returns over a full market cycle by investing solely in "Compounders", the world's leading companies that can generate, and sustain, the highest levels of financial productivity (i.e., return on equity, return on capital, and cashflow return on investment). In this Fund, we focus mainly on identifying high quality companies that are able to reinvest a significant portion of their cash flows back into their business at similarly attractive rates of return.

Performance data for periods less than 1 year is illustrated on a cumulative growth basis. UK investors may be liable to taxation on the income from the fund, depending upon their personal circumstances. The effect of taxation would have been to reduce the returns stated. The returns from your investment may be affected by changes in the exchange rate.

## Risk Rating

### Key Risks Related to the Fund

There is no capital guarantee or protection of the value of the Fund. The value of your investment and the income from it can go down as well as up and you may not get back the amount you originally invested.

The Fund may invest in units or shares of other investment funds. Such other funds may themselves be subject to their own fees and expenses

In view of the concentrated nature of the Fund's investments, the level of risk is expected to be higher than for a broader based portfolio and the value may be more volatile.

### Key Risks Related to the Share Class

The returns from your investment may be affected by changes in the exchange rate between the Fund's base currency, the currency of the Fund's investments, your share class and your home currency.

See "Risk Factors" in the UCITS' Prospectus and Fund Supplement for more information about risks.
